Outlook for 2019 (updated 17.5.2019)

In 2019, Fiskars expects the Group's comparable net sales to be at the same level as in 2018 (unchanged) and comparable EBITA to be below the previous year's level (previously: at the same level).

The outlook is influenced by the company's investments in growth initiatives that are expected to add sustainable value in the long-term. In addition, there are continued material risks relating to changes in the operating environment, e.g. Brexit and potential further increases to the U.S. tariffs. An unfavorable outcome of these risks might have a significant impact on the comparable net sales and comparable EBITA. Furthermore, fluctuations in currency rates might also have a considerable impact on comparable EBITA.

Comparable net sales excludes the impact of exchange rates, acquisitions and divestments. Items affecting comparability in EBITA include restructuring costs, impairment charges, integration related costs, acquisitions and divestments, and gain and loss from the sale of businesses.

Proposed Wärtsilä share distribution would change the baseline for dividend growth
