Business review

Operating environment in Q2

- Economic climate weakened in Europe, impacting retailers and consumers in many markets. The Nordic markets continued more stable than Southern Europe.
- In many European countries garden-related retail suffered from unusually poor and rainy weather.
- In the Americas, confidence among consumers deteriorated
- Spending at retail declined quarter to quarter, still remaining higher than previous year. Warmer weather helped DIY and garden retailers, some of which continued to work down inventories from previous year's poor garden selling season.

School, Office and Craft on a good track

Q2/2012

- Sales for home products below 2011 levels as sales declined in key Nordic markets and Southern Europe
- Exports to Eastern Europe and Asia developed positively
- New distribution for both Living and Kitchen
- School, Office and Craft products (SOC) continued on a good track with growth across main accounts
- Crafting novelties well-received

Q2

Outlook for 2012

Outlook for 2012 unchanged

- Fiskars operating environment weakened during second quarter as a result of increased economic uncertainty, and further financial instability could affect consumer and trade behavior adversely.
- Changes in demand for Home products during the last quarter could affect the full-year results
- Fiskars will continue implementing its integrated company strategy, the investment program in EMEA and investments in new product development and marketing
- We expect full-year 2012 net sales and operating profit excl. non-recurring items to amount to similar levels as in 2011
- The associated company, Wärtsilä, will continue to have a major impact on Fiskars' profit and cash flow in 2012
